

PSA Service and Repair

Proven Solutions Service & Repair is the perfect add-on for small to medium size service or repair businesses. It was designed to work with companies sending technicians to their customer's site as well as dealing with in house repairs.

Powerful Features

- Dispatch command and control centre,
- Creates Estimates and Service work orders,
- Technicians Scheduling,
- Customer Equipment with 18 user defined fields,
- Detailed Service History,
- Maintenance and support contracts,
- Warranty and third party,
- Value added inventory, for used sales (RV's, Recreational Vehicles, Used cars, ...),
- Service Packs for reduced data entry,
- Time sheet entry can be processed on a daily basis or as often as required,

Work Order System

The Work Order system is both powerful and easy to use. It offers the flexibility of scheduling multiple technicians, multiple pieces of equipment and any range of dates needed to complete the job.

From the Work Order screen users can access Service contracts, customer equipment, repair history and any other information relating to the customer or work performed.

Once completed simply click the convert button and the system generates an invoice.
