

PSA Restoration Contractor

**Providing integrated business solutions for Restoration Contractors.
Making Your Business More Profitable Through Accountability.**

Welcome to PSA Restoration Contractor

For years, there has been a void in the North American market place when it came to a powerful and proven accounting solution. There was a lack of software designed, built and priced for Restoration Contractors with BIG needs.

Well the wait is over. With our latest release of ***PSA Restoration Contractor***, your business will have all the tools it needs, to compete and be successful.

For those not familiar with Canam Systems and ***PSA Restoration Contractor*** let us take a few minutes to introduce ourselves. Canam has been in the Accounting Solution Business since 1994. As a systems integrator, solutions provider and accounting software developer we quickly recognized the weaknesses inherent in existing accounting software solutions. Most business needed to use a minimum of four software products to get the work done. Duplication means more staff and larger overheads.

We have proceeded to create a completely integrated accounting and job management solution that meets and exceeds the expectations of restoration and cleaning contractors. With our comprehensive integrated solution, managing your jobs and making business critical decisions has never been easier.

Today, with our offices located in Toronto and Barrie Ontario, as well as our new office in Niagara Falls New York, we offer a complete solution to the Restoration and Cleaning industries.

It is our goal to successfully provide our customers with a state of the art business solution, through quality software, continued development, and effective support.

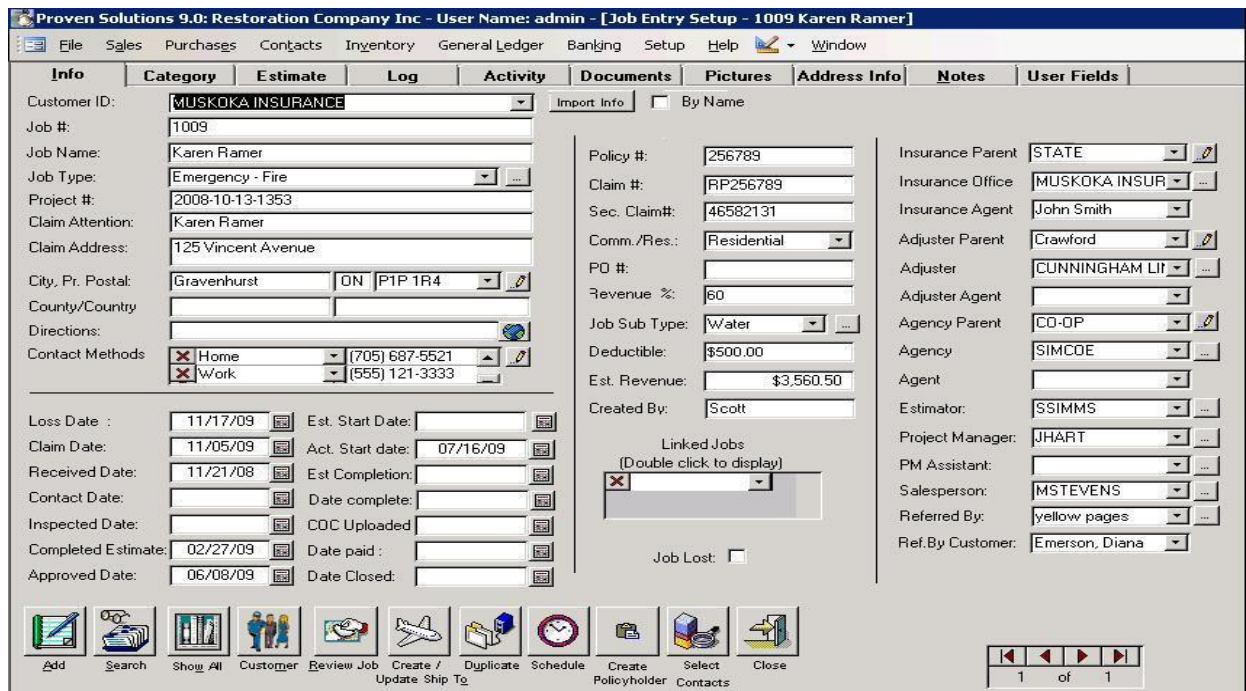

Making your business more profitable through accountability.

PSA Restoration Contractor can help your business succeed.

PSA Restoration Contractor

PSA Restoration Contractor brings all of the power, ease of use and industry integration that a successful restoration and cleaning business requires. It allows business owners and their management team to better understand and react to their critical financial and job related information that exists in their day-to-day operations.

PSA Restoration Contractor brings together many of your everyday business components; powerful accounting, detailed job management, scheduling, remote timesheet entry, equipment tracking and document management, marketing, CRM (customer relationship management) and importing of detailed Xactimate® estimates into one integrated solution.

1 of 1

PSA Restoration Contractor replaces most of your existing systems with a single completely integrated solution. One product, one solution. No more duplication of information with employees wasting their time searching for answers in multiple software products.

PSA Restoration Contractor allows all of your company critical information to easily flow through one integrated system allowing accurate job management, financial analysis and timely reporting. This unique environment allows you to manage all of your information without the information managing you. Duplication of data entry is eliminated.

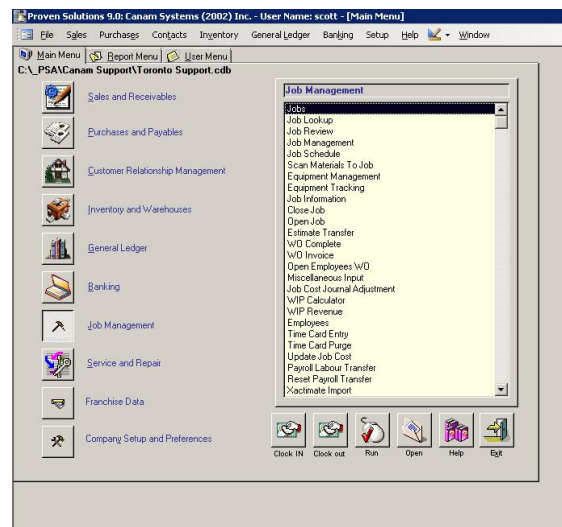

PSA Restoration Contractor has an exclusive link with Xactimate® allowing estimates to be imported directly into our job management system. Work orders are easily created, scheduled and printed or emailed to your employees and sub-trades. Job cost information flows effortlessly into the accounting system eliminating any need for duplicate data entry.

PSA Restoration Contractor can help your business succeed.

PSA Restoration Contractor

PSA Restoration Contractor has an impressive list of features:

- Complete integrated solution,
- No license fees,
- Importing of estimates from Xactimate[®],
- Powerful scheduling for employees, sub-trades, trucks and jobs,
- Ability to contour estimates and create work orders,
- Task based notification system. Notify your key people in the field in real time,
- Detailed job notes,
- Full document management - all electronic documents, picture, tasks, forms, including user defined merge documents,
- Automatically create work orders from the Xactimate[®] estimate,
- Remote time sheet entry allows your labor to be collected in real time. Payroll and job cost data are always up to date eliminating the need for manual data entry,
- Equipment tracking system, using barcode scanning and remote management,
- Unlimited additional address information; i.e. insurance company, adjuster, policy holder, building owner, superintendent, property manager,
- User defined fields with easy to use setup screen and more than 200 field options,
- Job review screen for project managers with detailed status of all job information including costs, revenue, and payments with profit and gross margin %,
- Quick and easy drilldown to all job and accounting information,
- No more duplication of data entry - from estimate to the financial statements,
- Management tools including financial dashboards and cash flow analysis,
- 380 + standard reports including many industry specific reports.

If you are looking for a powerful, integrated and easy to use system, one with flexibility and quick access to your financial and job related information, then **PSA Restoration Contractor** is just the solution for your business.
